

KUNAL HEMANT PASAD

Data Engineer | Data Pipelines | ETL | Distributed Systems

60 Paterson St, New Brunswick, NJ 08901

📞 848-391-7620 ✉ kunalpasad6523@gmail.com 🌐 [Portfolio](#) [LinkedIn](#) [Github](#)

EDUCATION

Rutgers, the State University of New Jersey, New Brunswick, United States

Expected: May 2027

Master of Science in Computer Science

GPA: 3.83/4.0

Relevant Coursework: Distributed Systems, Database Systems, Data Engineering, Machine Learning

Sardar Patel Institute of Technology, Mumbai, India

Dec 2021 – May 2025

Bachelor of Technology in Computer Engineering

GPA: 8.62/10

Relevant Coursework: Data Structures & Algorithms, Operating Systems, Computer Architecture

TECHNICAL SKILLS

Languages: Python, SQL

Data Engineering: ETL Pipelines, Data Modeling, Data Warehousing, Schema Design

Big Data & Streaming: Apache Kafka, PySpark

Cloud: AWS (S3, EC2, Lambda)

Tools: Docker, Kubernetes, FastAPI, Pandas

Databases: PostgreSQL, MySQL

Concepts: Distributed Systems, Batch Processing, Streaming Pipelines, Data Validation, Workflow Orchestration

PROFESSIONAL EXPERIENCE

EternIQ

Jan 2025 – May 2025

Data Engineer Intern

Mumbai, India

- Engineered batch and streaming pipelines processing 100K+ records with validation and schema enforcement
- Built ingestion workflows using Kafka for real-time data streams ensuring reliable delivery to downstream analytics systems
- Designed transformation workflows improving data quality and reducing inconsistencies across datasets by 30%
- Implemented monitoring, logging, and retry mechanisms ensuring reliability across distributed data pipeline workflows

Mukesoftware IT Consultants

Jul 2023 – Feb 2024

Full Stack Web Developer Intern

Mumbai, India

- Developed backend APIs handling 50K+ relational records supporting efficient data retrieval and processing
- Optimized SQL queries and indexing strategies improving database performance and reducing response latency by 30%
- Implemented data validation and integrity checks ensuring consistency across transactional and data pipelines
- Designed scalable database schemas enabling efficient joins, aggregations, and reporting across application modules

PROJECTS

Mutual Fund Data Pipeline & Portfolio Analysis | Python, SQL

- Built batch ETL pipelines using PySpark processing 5K+ financial records with cleaning and validation workflows
- Designed data models and transformation pipelines computing returns, volatility, and risk metrics across datasets
- Improved processing efficiency by 25% through optimized pipeline design and incremental computation strategies

DeliciousBytes – Scalable Backend System | Laravel, SQL, AWS, Docker, Kubernetes

- Designed relational data models supporting transactional workflows and ensuring data integrity across services
- Containerized services using Docker and Kubernetes enabling scalable deployment under varying workloads
- Optimized SQL queries and indexing improving data retrieval performance by 35% across distributed systems

MindSync – AI Knowledge Assistant | FastAPI, AWS, Vector Search

- Designed data ingestion pipelines including chunking, embedding generation, and semantic vector storage workflows
- Implemented retrieval pipelines reducing latency by 30% through caching and optimized data access strategies
- Built scalable data services supporting real-time ingestion and concurrent processing across data pipelines

Customer Churn Prediction & Analytics Pipeline | Python, SQL

- Built data preprocessing and feature engineering pipelines processing 50K+ records for large-scale analytics workflows
- Designed data transformation workflows enabling efficient feature extraction and model-ready dataset generation
- Achieved 0.91 ROC-AUC by optimizing data pipelines and improving feature quality for predictive modeling tasks
