

KUNAL HEMANT PASAD

Data Scientist | Machine Learning | Predictive Modeling | Data Analytics

60 Paterson St, New Brunswick, NJ 08901

📞 848-391-7620 ✉ kunalpasad6523@gmail.com 🌐 [Portfolio](#) 🔗 [Linkedin](#) 🐙 [Github](#)

EDUCATION

Rutgers, the State University of New Jersey, New Brunswick, United States

Expected: May 2027

Master of Science in Computer Science

GPA: 3.83/4.0

Relevant Coursework: Machine Learning, Distributed Systems, Database Systems, Statistical Learning

Sardar Patel Institute of Technology, Mumbai, India

Dec 2021 – May 2025

Bachelor of Technology in Computer Engineering

GPA: 8.62/10

Relevant Coursework: Data Structures & Algorithms, Operating Systems, Probability, Linear Algebra

TECHNICAL SKILLS

Languages: Python, SQL, Java

Data Science: scikit-learn, XGBoost, Pandas, NumPy, Feature Engineering, Time Series Forecasting

AI & LLMs: Prompt Engineering, RAG, HuggingFace, PyTorch, LLM Evaluation

Data Engineering: ETL Pipelines, Data Processing, Data Validation, FastAPI

Visualization: Tableau, Matplotlib

Tools: Git, Docker, AWS (S3, EC2, Lambda)

Concepts: Predictive Modeling, Statistical Analysis, Hypothesis Testing, Model Evaluation, Data Cleaning

PROFESSIONAL EXPERIENCE

EternIQ

Jan 2025 – May 2025

Data Science Intern

Mumbai, India

- Engineered scalable data pipelines processing 100K+ records with validation, transformation, and exploratory data analysis
- Designed prompt engineering strategies reducing hallucination rates by 25% and improving response reliability
- Developed evaluation framework analyzing 1K+ outputs, improving reasoning accuracy and identifying systematic failure cases
- Performed data preprocessing and feature engineering ensuring high-quality datasets for downstream modeling tasks

Mukesoftware IT Consultants

Jul 2023 – Feb 2024

Full Stack Web Developer Intern

Mumbai, India

- Optimized SQL queries and indexing strategies reducing data retrieval latency by 30% across production systems
- Processed and managed 50K+ structured records improving database efficiency and analytics readiness for downstream tasks
- Implemented data validation and integrity checks ensuring consistent, reliable datasets for analytics and reporting pipelines

PROJECTS

Customer Churn Prediction & Retention Analytics System | Python, scikit-learn, XGBoost, Pandas

Dec 2025

- Built classification models on 50K+ records achieving 0.91 ROC-AUC for accurate churn prediction performance
- Engineered 20+ behavioral features improving recall of high-risk customers by 15% through feature optimization
- Applied SHAP interpretability techniques identifying key churn drivers enabling targeted retention strategies and insights

Sales Forecasting & Revenue Prediction System | Python, Time Series, Pandas, scikit-learn, Tableau

Feb 2026

- Developed robust time-series forecasting models improving prediction accuracy by 12% over baseline regression models
- Engineered temporal features including lag variables and seasonality indicators enhancing model performance
- Designed interactive dashboards visualizing revenue trends enabling real-time analytics and business insights

MindSync – AI Knowledge Assistant | LLMs, RAG, FastAPI, AWS

Oct 2025

- Architected RAG-based system reducing hallucinated responses by 25% through context-aware retrieval and generation workflows
- Built embedding and vector search pipelines improving response relevance and understanding across datasets
- Optimized inference latency by 30% through caching mechanisms and efficient retrieval-generation pipeline design strategies

Mutual Fund Data Pipeline & Portfolio Performance Analysis | Python, Pandas, SQL

Aug 2025

- Built ETL pipeline using SQL and Python processing 5K+ time-series records ensuring data cleaning and normalization
- Computed financial metrics including returns, volatility, and drawdowns enabling portfolio performance analysis
- Improved data processing efficiency by 25% through optimized transformations and modular pipeline design
